

Manufacturer: Berry Plastics Corporation
Model: 300RCR
ASTM Type: VIIL

Description:

This package consists of a one piece plastic aerosol overcap (Figure 1), which fits over the rim on a straight walled aerosol container.

Figure 1

Inside the aerosol overcap there are four rims that are 90° apart (Figure 2). Three of the rims are the same size and one rim is smaller (see arrow in Figure 2). The aerosol overcap is removed by pushing up at the location marked "HERE", which corresponds with the smaller sized rim (see arrow in Figure 2).

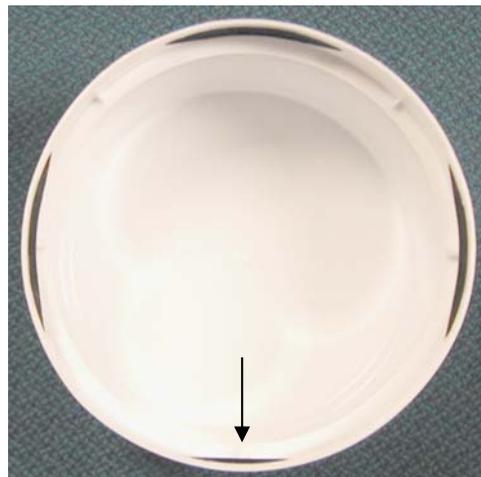

Figure 2

The manufacturer's instructions on the closure are a combination of written text and graphical illustrations (Figure 3):
