RECEIVED

JAN 11 2016

Division Director (3AR00)

Dear Mr. Garvin:

Attached is Maryland Department of the Environment's (MDE) recommendation to the U.S. Environmental Protection Agency of the list of sulfur dioxide sources in Maryland subject to the "Data Requirements Rule for the 2010 1-Hour Sulfur Dioxide (SO₂) Primary National Ambient Air Quality Standard (NAAQS)," (80 Fed. Reg. 51087). Consistent with the rule, the Department has included on the list those SO₂ emissions sources for which the state will be required to submit further air quality characterization. This includes sources having annual actual SO₂ emissions of 2,000 tons or more or, in the case of the C.P. Crane plant, having nearly 2,000 tons per year of emissions and being located close to other large sources.

If I may provide further information, please contact me or Mr. George (Tad) S. Aburn, Jr., Director of the Air and Radiation Management Administration, at 410-537-3255 or by email at george.aburn@maryland.gov.

Sincerely,

Ben Grumbles
Secretary

Maryland's Draft List of Sources Subject to the Final, 1-hour SO₂ Data Requirements Rule* 11/4/2015

<u>Facility Name</u>	<u>Facility ID (ORISPL)</u>	<u>Year</u>	<u>CAMD SO₂ (tons)</u>	<u>MDE Data System (TEMPO) SO₂ (tons)</u>
Brandon Shores	602	2014	3,145.09	12,757.31**
C P Crane	1552	2014	1,887.16	1,890.04
Chalk Point	1571	2014	3,928.48	3,933.20
Herbert A Wagner	1554	2014	9,610.26	12,757.31**
Luke Paper Co.	50282	2014	N/A	16,999.39
Morgantown	1573	2014	2,961.76	3,134.47

*Note that every other source in Maryland emits less than 1,000 tpy of SO₂, per TEMPO 2014 data.

**This is the total for Fort Smallwood, including both Brandon Shores and H.A. Wagner.
