Carl Daly  
Air Program Director  
US EPA, Region 8  
1595 Wynkoop Street  
Denver, Colorado 80202-1129

Dear Mr. Daly,

In accordance with 40 CFR Part 51.1203(a), the Utah Division of Air Quality (UDAQ) is hereby submitting this list of applicable sources identified pursuant to 40 CFR Part 51.1202 that have annual actual SO<sub>2</sub> emissions of 2,000 tons or more based upon the most recently available data for these sources, the 2014 Emissions Inventory (EI):

Source	Permit Holder	2014 EI SO <sub>2</sub> Emissions (tons)
Carbon Power Plant (closed April 2015)	PacifiCorp	9,241.4
Hunter Power Plant	PacifiCorp	3,939.3
Huntington Power Plant	PacifiCorp	2,479.2
Intermountain Power Plant	IPSC	4,371.5

Please note that while the Carbon Power Plant is included in this list based upon its exceedance of the 2,000 tons per year threshold in the 2014 Emissions Inventory, the plant ceased operation in April 2015 in accordance with Section XX, Regional Haze, of the Utah State Implementation Plan as adopted by the Utah Air Quality Board on June 3, 2015. Specifically, paragraph D.6.c of that section requires PacifiCorp to “permanently retire Carbon Units 1 and 2 by August 15, 2015.” A revocation letter (DAQE-GN100810007-16) for the Carbon Power Plant permit was signed on January 8, 2016. A copy of this letter is enclosed for your convenience.

Thank you and please contact me if you have any questions regarding this submittal.

Sincerely,

Bryce C. Bird  
Director
