Dear Mr. Stills:

Your email address "[stills@frontier.net](mailto:stills@frontier.net)" was already on our list--I just noticed that it wasn't the same as "[travis.stills@frontier.net](mailto:travis.stills@frontier.net)", and I wanted to make sure you were getting notifications if you wanted. Sorry to bother you. However, if you didn't already receive the message below from April 14, 2016 (it could be in a "junk" or "SPAM" folder), please let me know.

Tony Nesky

Dear Mr. Nesky,  
I have signed up for these notices using the email I use for official, legal communications - [stills@frontier.net](mailto:stills@frontier.net). I have received similar notices regarding the rulemaking at that address, and have used that address to correspond

with EPA staff and counsel. Thank you for noticing the omission and reinstating my name to the list. Please ensure use of [stills@frontier.net](mailto:stills@frontier.net) for further correspondence.

In order to ensure accountability and transparency of the ongoing rulemaking, please inquire and let me know the reason my name/email was removed from the list.

Thank you,  
Travis Stills

Ann:

We need to find out what has to happen with the ICR we submitted to OMB for the Subpart W proposal. Reid and I have both followed up with Courtney Kerwin (you may remember that she was the OMB desk officer at the time), but have not heard back. Can you help us out? Thanks.

Also, I have a note from OGC this morning regarding comments that we did not adequately address some executive orders. I may want to discuss this with you. Thanks.

Dan

**Subject:** Comments & Responses in Preamble - Subpart W

Hi Dan,

As you and I discussed last week, to make sure I'm using Sonja's time efficiently, do you know which comments and responses do you anticipate including in the preamble? In addition to reviewing the legal comments, I'd like Sonja to focus on the RTCs that will be in the preamble as we will likely have more time to work with the remainder of the RTC after sending the rule to OMB.

Thanks!

**Subject:** RE: heap?

Hello Phil:

Good to hear from you. Cotter has no plans to conduct any heap leaching at the Canon City Mill. We are currently working through the Superfund process to develop a ROD and then start decommissioning. Consequently, please don't include Cotter in the NESHAPS background documentation.

Cheers,

Stephen J. Cohen, PG

**Subject:** heap?

Steve,  
Hope this finds you well.  
Once upon a time, Cotter was considering a heap for the top of the secondary.  
Now that the mill is gone, is that still a thing or is that no longer in the plans?  
I ask because we are working on the background information docs for the NESAH rulemaking.  
If it is no longer in the plans, I don't want to have mention of it in the background docs.  
If Cotter is still considering that, I'll leave mention of it in.

Can't discuss what is in or not in the rulemaking; this is about background information being current only.  
Teleworking from home today, ergo the home email address instead of EPA...  
Thanx,  
PVE

We need to find out what has to happen with the ICR we submitted to OMB for the Subpart W proposal. Reid and I have both followed up with Courtney Kerwin (you may remember that she was the OMB desk officer at the time), but have not heard back. Can you help us out? Thanks.

Also, I have a note from OGC this morning regarding comments that we did not adequately address some executive orders. I may want to discuss this with you. Thanks.

Dear Mr. Nesky,

Please add [sarah@uraniumwatch.org](mailto:sarah@uraniumwatch.org) to the Subpart W list, but not the other address.

Thank you,

Sarah Fields

**Subject:** RE: Section 1 Responses?

Dan,

We're still working through some of the more thorny legal responses. As Sue and I discussed with you last week, it looks like the legal responses are going to be on a separate track from the rest of the RTC document. Thanks!

**Subject:** Section 1 Responses?

Emily:

Just checking to see how you are doing in preparing responses to the legal authorities comments. I am hoping to send the entire package (preamble/rule, RTC, BID/EIA) to the workgroup for review by COB Friday. If Section 1 can be part of that, great. Otherwise we can move it on a separate track. Thanks.

Problems. Apparently they canceled Reid's conference code and did not tell us. We had planned to use it for convenience. I called Sarah Fields and explained, she will help get the word out and we will reschedule.

**Subject:** Subpart W call today - need to drop off at 11:30 am

Hi Dan –

I will be on the Subpart W call today from 11:00 – 11:30 am, but then I need to drop off for another call. I wanted to let you know ahead of time as I don't plan to announce that on the call itself.

Emily will be on the call so you will have OGC backup during the entire call.

Good luck. ☺

**Subject:** Rule Effectiveness materials per your request

The first five attachments are samples of the way Rule-Effectiveness work was written up in preambles and Action Memos. There is no template or preferred writeup style -- the main thing is to describe how you addressed rule-effectiveness as you developed the rule.

The last two attachments are materials that the Administrator and Janet distributed in early 2015 to kick off the Rule-Effectiveness initiative. I'm including these materials just in case Reid didn't pass them on to you.

Emily:

Just checking to see how you are doing in preparing responses to the legal authorities comments. I am hoping to send the entire package (preamble/rule, RTC, BID/EIA) to the workgroup for review by COB Friday. If Section 1 can be part of that, great. Otherwise we can move it on a separate track. Thanks.

Dan

**Subject:** Reminder: Preamble/Rule Language

All,

Just a reminder that you have the draft preamble and rule for subpart W for review. Hopefully you will be able to get your comments in by the end of this week, but we did give you three weeks, which ends next Tuesday. I've heard from Stuart so far (thank you Stuart!).

I also wanted to give you an idea of next steps. My plan is to have a complete draft package, which includes the revised rule/preamble, response to comments document, and BID/EIA, to you for review by the end of next week (April 8). I will be on travel the week of April 11<sup>th</sup>, so it would be best if you are not waiting on me. With luck, there will not be significant issues raised, which would allow us to have perhaps one more review before having a package that we agree is ready for OMB review. I do anticipate a few changes to what is in the current draft, primarily regarding some of the definitions. I will try to highlight any such changes.

I appreciate your attention as we try to push this through. Please don't hesitate to get in touch with me if you have questions. Thanks.

**Subject:** RE: Comments on RTCs

Thanks. I have done an initial read-through and don't think there is anything we can't address, although some of the comments related to the BID/EIA need more scrutiny. I am going to try to create an overall listing (maybe a spreadsheet) of the sections/issues to help with consolidation. Some of these topics pop up in too many places, so that should help with the preamble.

In reviewing Section 12 in more detail, I have identified a couple of comments that I think belong in Section 1. They do not raise new issues, although the first one also makes claims about the effectiveness of the current work practices.

### **C. THE EPA SHOULD ISSUE NUMERICAL STANDARDS FOR RADIONUCLIDE EMISSIONS FROM URANIUM RECOVERY FACILITIES**

The EPA should establish a numerical standard for radon emissions. Section 112(d)(2)(D) allows the EPA to establish a "design, equipment, work practice, or operational standard" under Section 112(h)(1) if it is "not feasible... to prescribe or enforce an emission standard."

When the EPA decides to issue work practice standards, Section 112(h)(4) requires that “any standard... shall be promulgated in terms of an emission standard whenever it is feasible to promulgate and enforce a standard in such terms.” The hazardous air pollutant program under Section 112 is aimed at requiring numerical emission standards wherever possible. With respect to uranium recovery facilities, it is feasible to establish and enforce numerical emission standards (as evidenced by the current existence of numerical radon flux standards for “existing impoundments”). Therefore, the EPA should require uranium recovery facilities to monitor their emissions and meet numerical emission standards.

....

Even if the EPA chooses to issue work practice standards for uranium recovery facilities, it should ensure that the work practice standards achieve the same or greater level of emissions reduction as a numerical emission standard would. Legislative history indicates that Congress intended the degree of protection achieved by work practice standards to be the same as the degree of protection achieved by numerical emission standards. Legislative History at 8,522-23. The work practice standards that the EPA is now proposing to adopt as GACT have resulted in emissions that were higher than what the numerical emission standard allowed. The EPA should not establish a work practice standard that allows higher emission levels than a numerical standard would permit.

(Comment 0155-35, see full document for supporting evidence)

Clearly, it is feasible to prescribe and enforce the radon emission standard in Section 61.252(a) [of CAA]. Clearly, the application of the measurement methodology is practicable and there are no technological and economic limitations related to the use of the measurement methodology used to determine compliance with the standard. For 25 years the EPA has relied on an emission standard for the control of radon from uranium mill tailings. EPA has not demonstrated that this method is unreliable, unfeasible, or has significant technical or economic limitations. Therefore, there is no legal basis for eliminating this standard for existing mill tailings impoundments and replacing it with a work practice standard.

(Comment 0153-143)

**Subject:** Comments on RTCs

Dan,

Attached are our comments and suggested edits on the RTC documents. Please reach out with questions or if you would like to discuss. You'll see there aren't many comments on document 12. We'll take another look at this one after you've had a chance to work through Reid's first cut at these responses.

We're in progress on the legal RTCs.

Thanks!

Dan –

There is an email distribution list on the Subpart W website. You should email those on it and tell them what happened. You should also post something on the website. Tony can help with this. The problem is that we have this obligation under the settlement agreement, and by not having this call today, we are not meeting that obligation.

**Subject:** RE: Subpart W call today - need to drop off at 11:30 am

Problems. Apparently they canceled Reid's conference code and did not tell us. We had planned to use it for convenience. I called Sarah Fields and explained, she will help get the word out and we will reschedule.

Hi Dan –

I will be on the Subpart W call today from 11:00 – 11:30 am, but then I need to drop off for another call. I wanted to let you know ahead of time as I don't plan to announce that on the call itself.

Emily will be on the call so you will have OGC backup during the entire call.

Good luck. ☺

**Subject:** Reminder: Preamble/Rule Language

All,

Just a reminder that you have the draft preamble and rule for subpart W for review. Hopefully you will be able to get your comments in by the end of this week, but we did give you three weeks, which ends next Tuesday. I've heard from Stuart so far (thank you Stuart!).

I also wanted to give you an idea of next steps. My plan is to have a complete draft package, which includes the revised rule/preamble, response to comments document, and BID/EIA, to you for review by the end of next week (April 8). I will be on travel the week of April 11<sup>th</sup>, so it would be best if you are not waiting on me. With luck, there will not be significant issues raised, which would allow us to have perhaps one more review before having a package that we agree is ready for OMB review. I do anticipate a few changes to what is in the current draft, primarily regarding some of the definitions. I will try to highlight any such changes.

I appreciate your attention as we try to push this through. Please don't hesitate to get in touch with me if you have questions. Thanks.

Thanks. My goal is to send out a complete revised preamble/rule by COB Friday, along with response to comments and the draft BID/EIA. Based on some discussions with OGC, the preamble is being reorganized to be more consistent with some recent NESHAP rules.

Dan,

Sorry for my delay. Attached are some comments and edits. Please be aware that the edits I provided would need to be checked for accuracy. I'm not sure that they are technically correct.

**Subject:** Reminder: Preamble/Rule Language

All,

Just a reminder that you have the draft preamble and rule for subpart W for review. Hopefully you will be able to get your comments in by the end of this week, but we did give you three weeks, which ends next Tuesday. I've heard from Stuart so far (thank you Stuart!).

I also wanted to give you an idea of next steps. My plan is to have a complete draft package, which includes the revised rule/preamble, response to comments document, and BID/EIA, to you for review by the end of next week (April 8). I will be on travel the week of April 11<sup>th</sup>, so it would be best if you are not waiting on me. With luck, there will not be significant issues raised, which would allow us to have perhaps one more review before having a package that we agree is ready for OMB review. I do anticipate a few changes to what is in the current draft, primarily regarding some of the definitions. I will try to highlight any such changes.

I appreciate your attention as we try to push this through. Please don't hesitate to get in touch with me if you have questions. Thanks.

Subject: Subpart W

Hi Sue,

I think I'm starting to get my head around Subpart W and what the Rule is requiring (or aiming to require). Along those lines, I've re-read that draft preamble and have a set of questions. I've focused my questions on the regulatory text (starting at p. 34). I know that Dan is significantly reworking this draft. But since this is the only document I have to understand what we're planning to say in the final rule, I thought it made sense to try to start wrapping my head around it.

If you have time, could we chat through the comments I've made in the regulatory text? No rush, of course. Some of my comments are just that the preamble and reg text are inconsistent. I assume Dan will correct that, or we can keep an eye out for it in the next version of the rule.

Thanks so much for your help!

Emily

Hi Dan –

I will be on the Subpart W call today from 11:00 – 11:30 am, but then I need to drop off for another call. I wanted to let you know ahead of time as I don't plan to announce that on the call itself.

Emily will be on the call so you will have OGC backup during the entire call.

Good luck. ☺

Emily:

Just checking to see how you are doing in preparing responses to the legal authorities comments. I am hoping to send the entire package (preamble/rule, RTC, BID/EIA) to the workgroup for review by COB Friday. If Section 1 can be part of that, great. Otherwise we can move it on a separate track. Thanks.

Dan

**Subject:** Comments & Responses in Preamble - Subpart W

Hi Dan,

As you and I discussed last week, to make sure I'm using Sonja's time efficiently, do you know which comments and responses do you anticipate including in the preamble? In addition to reviewing the legal comments, I'd like Sonja to focus on the RTCs that will be in the preamble as we will likely have more time to work with the remainder of the RTC after sending the rule to OMB.

Thanks!

Subject: Subpart W

Hi Sue,

I think I'm starting to get my head around Subpart W and what the Rule is requiring (or aiming to require). Along those lines, I've re-read that draft preamble and have a set of questions. I've focused my questions on the regulatory text (starting at p. 34). I know that Dan is significantly reworking this draft. But since this is the only document I have to understand what we're planning to say in the final rule, I thought it made sense to try to start wrapping my head around it.

If you have time, could we chat through the comments I've made in the regulatory text? No rush, of course. Some of my comments are just that the preamble and reg text are inconsistent. I assume Dan will correct that, or we can keep an eye out for it in the next version of the rule.

Thanks so much for your help!

Emily

Hi Dan –

I will be on the Subpart W call today from 11:00 – 11:30 am, but then I need to drop off for another call. I wanted to let you know ahead of time as I don't plan to announce that on the call itself.

Emily will be on the call so you will have OGC backup during the entire call.

Good luck. ☺

Subject: Subpart W

Hi Sue,

I think I'm starting to get my head around Subpart W and what the Rule is requiring (or aiming to require). Along those lines, I've re-read that draft preamble and have a set of questions. I've focused my questions on the regulatory text (starting at p. 34). I know that Dan is significantly reworking this draft. But since this is the only document I have to understand what we're planning to say in the final rule, I thought it made sense to try to start wrapping my head around it.

If you have time, could we chat through the comments I've made in the regulatory text? No rush, of course. Some of my comments are just that the preamble and reg text are inconsistent. I assume Dan will correct that, or we can keep an eye out for it in the next version of the rule.

Thanks so much for your help!

Emily

Hi Phil,

I talked to Tom Gieck about the Maybell site and here is his answer to your question:

"

Maybell remained open for approximately 10 years from termination of processing until it was capped. I would not say that it just remained open to the elements for that period of time as there was a full time staff on site to perform O&M activities which, in the case of Maybell, consisted of continuously recirculating water from the evaporation pond to the top of the heap, i.e., heap essentially used to store contaminated process water as well as control any windblown material from the heap. Any erosional issues associated with the heap were routinely repaired, site controls maintained, etc.

"

I have also chatted with Dave Holland from Hecla and checked the draft Durita CRR. Looks like a 2.5 ft random cover was placed after the operations ceased.

Hope these info help!

Shiya

Shiya,

I hope this finds you well. I have a specific question we are trying to answer that you may be able to help with...

It relates to the Hecla-Durita and the Maybell heap leach piles.

We are trying to figure out if they went into closure (i.e. capped) right away after they stopped processing, or did they remain open to the elements for some period of time? I don't know as they were capped before I got to CDPHE.

Jerry Goad might remember rather than trying to dig through the records.

John Hamrick would also know, but he retired from Cotter and I don't have a current email address...

We are working on a final rulemaking and need to be accurate in our statements.

Any help you can provide will be appreciated. We are of course on deadline and need the information soon...

Thanx,

PVE

Emily, I'm sorry I've had such a hard time getting to the Sub W stuff. I will review as much as I can today, but I may not get to absolutely everything. I would prefer to focus on the comment responses that are going to be in the preamble itself as our review of the others need not be so expedited. And yes, I would like to look at the legal responses before those go to Dan. Thanks! – Sonja

Hi Sonja,

For the Subpart W RTCs that Dan prepared and the current draft of the final rule, do you expect to have comments? Or are you planning to wait until we see the next turn from Dan? For the current drafts, Dan asked that we send him comments by the end of the week (and I'm going to out on Friday, my compressed day).

I anticipate having a draft of the legal comments to you and Sue later today. I expect you'll want to take a look at those before I send them to Dan?

Thanks!  
Emily

**Subject:** Whereabouts Wed-Fri

I will be out at the EIG Training again from Wednesday through Friday this week. I will check e-mail in the evenings and will keep my cell with me so I will be reachable if something urgent arises. However, today will be my last day in the office this week. If you need something before Friday, please let me know soon. Thanks! – Sonja

Subpart W Workgroup Members:

Attached is a briefing prepared for the ORIA Acting OD in advance of the package moving to OAR at the end of the week. Janet McCabe has also requested a briefing on Thursday. It will be only 30 minutes but will probably look similar.

Please feel free to use this briefing for your management as needed. Also please let me know as soon as possible if you have any concerns with the package moving forward. Thanks.

Dan

**Subject:** RE: Subpart W Package Pieces for Review

Hi all,

Since I will be out on Friday (and in case the package is ready to go to OAR by then), all you would need to do is:

- Make 3 copies of every document in the package
- Make CD-RW with all electronic documents included in the package

Then you would need to run it over to the Reg. Management folks. My two contacts there are:

- Ruth Morgan ([morgan.ruthw@epa.gov](mailto:morgan.ruthw@epa.gov); 564-1326, Room 5442-Y in WJC-N)
- Wendy McQuilkin ([mcquilkin.wendy@epa.gov](mailto:mcquilkin.wendy@epa.gov); 564-1348, Room 5442-S in WJC-N)

Let me know if you have any further questions. If something comes up on Friday you can always give me a call on my cell as well (703-725-8367).

Thanks!

Ray

**Subject:** Subpart W Package Pieces for Review

Attached is a draft Action Memo from Jon to Janet recommending that the rule be submitted for OMB review. Also attached is a draft memo from Janet to OP requesting same. These are based on the versions that went with the proposal. Ray is checking to see who the right person in OP is – it appears that Laura Vaught is now in OCIR, although the websites still list her as AA. I am working on other pieces of the package, including the draft Action Memo from Janet to Gina that goes with the post-OMB package for signature.

If Jon is not going to be in the office on Friday, can we get him to sign the memo tomorrow?

**Subject:** Check in: NTC meeting tomorrow

Hi Ingrid,

Are you attending the NTC meeting tomorrow? I'm going on behalf of IED—this is the first time I will have participated in this meeting.

I found this in an email from Pat Childers:

*The only info given to Janet and Gina was the agenda for wednesday and some info on leaded fuel for small planes. Oita was given the neshap subpart w info as well which the oria rep should be able to discuss on Tuesday if Scott Clow brings the issue up.*

If you are not going, could you give me a couple of bullets on NESHAP subpart W? I listen to weekly updates during ORIA Senior Staff meeting so I know the rule went to OAR on 6/3, but if I had to say more than that, I'd be lost!!

Thanks,

Alisa

**Subject:** Check in: NTC meeting tomorrow

Hi Ingrid,

Are you attending the NTC meeting tomorrow? I'm going on behalf of IED—this is the first time I will have participated in this meeting.

I found this in an email from Pat Childers:

*The only info given to Janet and Gina was the agenda for wednesday and some info on leaded fuel for small planes. Oita was given the neshap subpart w info as well which the oria rep should be able to discuss on Tuesday if Scott Clow brings the issue up.*

If you are not going, could you give me a couple of bullets on NESHAP subpart W? I listen to weekly updates during ORIA Senior Staff meeting so I know the rule went to OAR on 6/3, but if I had to say more than that, I'd be lost!!

Thanks,  
Alisa

Daniel and Ingrid:

Pat, Alisa, Beth and I wanted to make sure that you have all of the necessary information in preparation for tomorrow's NTC representative w/ OAR @ 1:30 pm to provide your support and expertise.

The call in # is Call-in: 1-866-299-3188  Code: 202-564-9957#

Alisa, Pat and myself will be present in person. If you any additional questions please do not hesitate to ask us?

What has been provided to Alisa regarding a potential topic area from some NTC memberships based on what RPD has drafted and sent to add to the Draft -Tribal Air Agenda.

### **Update on NESHAPS Subpart W rulemaking process.**

a) Finalize Revision to National Emission Standard for Hazardous Air Pollutants (NESHAP) for radon emissions for operating mill tailings (40 CFR 61, subpart W). EPA consulted with the Ute Mountain Ute Tribe in FY 2014 and FY 2015. We held follow up meetings with Ute Mountain Ute and other interested tribes, as requested, following publication of the final rule in 2015.

For Revision to National Emission Standards for Hazardous Air Pollutants (NESHAP) for radon emissions for operating mill tailings (40 CFR 61, subpart W):

- 1) EPA sent letters to approximately 50 tribes, in uranium producing areas, announcing the proposed rule, and requested the tribes to seek consultations with EPA. EPA held a tribal consultation with the Ute Mountain Ute Tribe in July 2014. There was significant communication between EPA and the Tribe prior to the consultation itself, and the communication with the Tribe continued throughout the comment period for the proposed rule.
- 2) EPA staff held public meetings that included tribal members or representatives in White Mesa, Utah; Gallup, New Mexico; Tuba City, Arizona; and Rapid City, South Dakota.
- 3) EPA also presented a national webinar for interested parties.

If you have any modification, additions or changes. Please add and send to Alisa and I by COB today.

Regards,

---

Washington, D.C. 20460  
PHONE: (202) 566-0626 

\*\*\*\*\*

**Attachment A:** List of NTC attendees for the July meetings

**Attachment B:** Full schedule of meetings for June 7<sup>th</sup> (so you can see who will be meeting before and after OAR)

**Attachment C:** Agenda for full National Tribal Operations Committee (NTOC) meeting on June 8<sup>th</sup> (NTC, AAs, RAs)

**Attachment D:** Additional Attendees (ECOS and tribal partnership groups). All should be at the full NTOC meeting on June 8<sup>th</sup>. Some may join the NPM – NTC meetings on June 7<sup>th</sup> & 9<sup>th</sup>.

**Schedule of Events:**

- June 7<sup>th</sup>: OAR meeting with NTC & NTAA; other attendees likely
- June 7<sup>th</sup>: Other NPM meetings with NTC and respective tribal partnership groups, by media
- June 8<sup>th</sup> (morning): NPM meetings with NTC and tribal partnership groups, NTC meeting with tribal partnership group co-chairs
- June 8<sup>th</sup>: 1 – 5 pm: Full National Tribal Operations Committee (NTOC) meeting (NTC, AAs, RAs)
- June 9<sup>th</sup>: Other NPM meetings with NTC and respective tribal partnership groups, by media

**National Tribal Caucus.** Full roster of NTC members (not all attending can be found at: <https://www.epa.gov/tribal/national-tribal-caucus> )

The National Tribal Caucus (NTC) is a national body of high-level tribal advisors. Members are selected on a regional basis by each Regional Tribal Operations Committee (RTOC) or its equivalent, and represent all tribes within their regions. Their primary focus is to identify and address tribal environmental issues that are national in scope, cross-agency or cross-media in nature, or that may be emerging or urgent.

The NTC is the body of tribal representatives, selected by their RTOCs, who meet monthly (via conference call) with AIEO and EPA Regional & Headquarters Tribal Program Coordinators. The NTC meets at least annually with the Administrator, AAs, and RAs to discuss policy environmental issues of importance to Indian country and Alaska Native Villages, with the intent to influence budget or policy decisions. This convening of the NTC and EPA senior political leadership is called the NTOC.

- Tribal partnership group representatives from the various media (air, water, waste, Exchange Network, toxics, and pesticides) have also been invited to participate and in most cases, co-lead these

discussions with NPMs as subject matter experts on their specific media areas.

- NTAA (Andy Bessler and Bill Thompson) will be participating in the discussion with OAR on June 7<sup>th</sup>. Bill Thompson also plans to participate in the other NPM discussions as well
- Other tribal partnership group representatives, aside from NTAA, are also welcome to join the OAR or any other NPM discussion.
- My understanding, from AIEO, is that the NTC and the partnership group representatives will be leading these discussions (see discussion questions) with EPA ready to provide updates and feedback.
- Getting the NTC interested/engaged in IAQ would be a positive step forward as the NTC provides input to senior EPA leadership (career & political) of environmental issues of importance to Indian country and Alaska Native Villages and would provide an opportunity to increase awareness among tribes, RTOCs, and also across the Agency at the senior level.
- To my knowledge, IAQ has not been mentioned at past NTOC meetings, but Pat Childers could confirm if it has been mentioned as an issues in the NPM – NTC specific discussions
- Bill T may be key in relaying the importance of the IAQ Needs Assessment and encouraging the NTC to spread the word when it reopens for input
- It would be helpful to relay the spectrum of EPA's IAQ efforts (radon, asthma, guidance, training/webinars, other technical assistance) and also discuss the efforts to work more broadly across the federal government and with tribal governments to increase awareness of the connection between healthy homes in tribal communities and home construction, renovation, repair, and indoor practices. Discussing efforts to get agreement among other federal agencies to permit use of those specific funding sources to address or promote good IAQ practices.
- AIEO has asked the NTC to hold on discussions related to budget this year, due to the coming transition in Administrations; however there is always a possibility it may come up – particularly in the area of resources available to address IAQ.

**Subject:** NTC prep material due COB 6/2

Hi Chris,

To equip me for the June 7<sup>th</sup> meeting, please provide by COB tomorrow:

- Backgrounder on NTC (who, why, implications)
- IAQ centric answers to the questions below, that were on the meeting appointment
- Qs/As for anything else you think may come up
- What you'd like me to do/listen for, in particular; who you would like me to engage.

Thanks,

Alisa

1. Greater funding opportunity for tribes to participate. Ozone impacts and effects in Indian Country
2. Update on NESHAPS Subpart W rulemaking process,
3. Response form EPA OAR to the NTAA's annual Status of Tribal Air Report
4. Funding
5. Tribal Indoor Air Quality Programs - CAA 103/105 funding is inadequate; Tribes need a new, separate source of funding for IAQ work.
6. Training for permitting for approval by tribes on minor source rules.
7. Indoor air issues involving monitoring equipment.

## Additional Attendees

### 2016 National Tribal Operations Committee Meeting

**Alexandra Dapolito Dunn**

Environmental Council of the States  
Executive Director

**Julie Cahoon**

Kauffman and Associates, Inc.

**Diane Barton**

Columbia River Inter-Tribal Fish Consortium  
National Tribal Toxics Council

**Fred E. Corey**

Aroostook Bank of Micmacs  
Tribal Pesticide Program Council

**Kathie Brosemer**

Sault Tribe of Chippewa Indians  
National Tribal Water Council

**Curtis Munoz**

Kiowa Tribe Environmental Director  
Tribal Science Council

**Angie Reed**

Penobscot Indian Nation  
Exchange Network Tribal Governance Group

**Bruce Jones**

Northwest Indian Fisheries Commission  
Exchange Network Tribal Governance Group

**Bill Thompson**

Penobscot Nation  
National Tribal Air Association

**Andy Bessler**

Institute for Tribal Environmental Professionals  
National Tribal Air Association

**NTC Discussion with Office of Air and Radiation**  
**Talking Points and Briefing Notes for June 7<sup>th</sup>, 2016 1:30p - 3:00p**  
**Location: WJC South Room 6045**

**Greater funding opportunity for tribes to participate. Ozone impacts and effects in Indian Country**

OAR recognizes the need for ongoing training and capacity building with our tribal partners. These opportunities are currently conveyed through our direct interactions with tribes and through the implementation of key grants, such as a cooperative agreement with Northern Arizona University's Institute for Tribal Environmental Professionals (ITEP) and ongoing efforts with the National Tribal Air Association (NTAA). The following are OAR's specific training and capacity building activities for 2016-2017:

**What has been proposed for FY16 related to Ambient Air Quality and Toxics:**

- a. Provide informational webinars and conference calls on program and regulatory development and implementation to allow tribes the opportunity to participate in the rulemaking process.
- b. Provide tribal designations support through training, technical tools and air quality analyses to allow tribes to participate in the designations process. [OAQPS]
- c. Expand the areas of training and general permitting to assist tribes with implementation of the Tribal New Source Review (NSR) rule. [OAQPS]
- d. Provide guidance and trainings for program development (i.e., Tribal Implementation Plan (TIP) Guidance and specific training on NSR). [OAQPS]
- e. TAMS Center Trainings: the TAMS Center will conduct 5-6 classroom courses annually including:
  - 1) GIS application in Air Quality.
  - 2) Air Pollution Technology.
  - 3) Management of Air Quality Grants.

**Update on NESHAPS Subpart W rulemaking process,**

a) Finalize Revision to National Emission Standard for Hazardous Air Pollutants (NESHAP) for radon emissions for operating mill tailings (40 CFR 61, subpart W). EPA consulted with the Ute Mountain Ute Tribe in FY 2014 and FY 2015. We held follow up meetings with Ute Mountain Ute and other interested tribes, as requested, following publication of the final rule in 2015.

For Revision to National Emission Standards for Hazardous Air Pollutants (NESHAP) for radon emissions for operating mill tailings (40 CFR 61, subpart W):

- 1) EPA sent letters to approximately 50 tribes, in uranium producing areas, announcing the proposed rule, and requested the tribes to seek consultations with EPA. EPA held a tribal consultation with the Ute Mountain Ute Tribe in July 2014. There was significant communication between EPA and the Tribe prior to the consultation itself, and the communication with the Tribe continued throughout the comment period for the proposed rule.
- 2) EPA staff held public meetings that included tribal members or representatives in White Mesa, Utah; Gallup, New Mexico; Tuba City, Arizona; and Rapid City, South Dakota.
- 3) EPA also presented a national webinar for interested parties.

b) "Health and Environmental Protection Standards for Uranium and Thorium Mill Tailings," (40 Code of Federal Regulations Part 192 or 40 CFR 192). Informational webinars and presentations were made in 2015. A letter was sent to tribes in explaining the proposed rulemaking and inviting tribes to consult on the proposal. No requests to consult were received.

Staff presented on several National Tribal Air Association conference calls with numerous tribes in attendance. Presentations addressed 40 CFR 192, 40 CFR 61 subpart W, and 40 CFR 190.

For Health and Environmental Protection Standards for Uranium and Thorium Mill Tailings (40 Code of Federal Regulations Part 192 of 40 CFR 192):

- 1) Made informational webinars and presentations to explain the proposal.
- 2) Sent an invitation to tribes in January 2015 explaining the proposed rulemaking and inviting tribes to consult on the proposal. No requests to consult were received.

**NTC Discussion with Office of Air and Radiation**  
**Talking Points and Briefing Notes for June 7<sup>th</sup>, 2016 1:30p - 3:00p**

**Location: WJC South Room 6045**

- 3) Held 4 public hearings. At the Chadron, NE hearing in May 2015, we had significant attendance by members of the Sioux Tribe. Four members of the Sioux Tribe testified, including a representative from the Oglala Sioux Natural Resource Regulatory Agency.

Invited federally recognized tribes to consult with the EPA on 40 CFR 192 and 40 CFR 61 Subpart W.

**Response form EPA OAR to the NTAA's annual Status of Tribal Air Report:**

Based on IED's ORIA Tribal Strategy, TAMS IAQ Implementation plan and other feedback from more advocacy for more IAQ Tribal training (i.e. NTAA's STAR report, etc.) EPA's Indoor Environments Division (IED) looks forward to more extensive collaboration with the TAMS leadership, and the TAMS Steering Committee and its members about how to appropriately and effectively expand TAMS' training audience, secure new markets and bolster more demand for IAQ training in FY15-16 and beyond.

In 2016-17, IED is banking on the deliberate collaborative relationships with Tribal IAQ advocates and stakeholders like TAMS, NTAA's-IAQ Workgroup, the Native American Indian Housing Council, and federal agencies like HUD's - Office of Native American Programs, HHS, USDA and others. These relationships will results in significantly more tribes applying for grants and funding opportunities – with “good” IAQ applications. It is with these deliberate activities more IAQ interventions will be achieved within Tribal communities.

**Funding:**

OAR administers over 12 million dollars in state and tribal assistance grants to provide for tribal governments and institutions to administer tribal air and related training programs. Tribes have continued to report out to OAR on the effect this lack of adequate funding has had on them. OAR was not immune to reductions either.

NTAA Executive Committee, TAMS Steering Committee and NTF – OAR's primary partners in implementing the tribal air program are the tribes themselves, the NTAA Executive Committee and TAMS Steering Committee. The NTAA and TAMS committees act as a conduit to the tribes and jointly sponsor the annual National Tribal Forum on Air Quality (NTF). OAR partnered with ITEP and the NTAA Executive Committee to support the NTF in 2015. In 2015-6, OAR continues to support development of tribal capacity to improve outdoor and indoor air quality and implement the Clean Air Act (CAA) in Indian country

**Tribal Indoor Air Quality Programs - CAA 103/105 funding is inadequate; Tribes need a new, separate source of funding for IAQ work.**

Briefly, there is significant competing interests related to the current suite of ambient air related program funding and how it's administered does not allow IAQ to always flourish – as it should. What has been done in the past, at this juncture, does not necessarily allow IAQ work and significant efforts to thrive; be distinguishable and sincerely be as successful. Thus, there is a growing philosophy that for IAQ risk reduction programmatic work and measurable efforts to be made...a separate source of funding would be best.

**NTC Discussion with Office of Air and Radiation  
Talking Points and Briefing Notes for June 7<sup>th</sup>, 2016 1:30p - 3:00p  
Location: WJC South Room 6045**

**Training for permitting for approval by tribes on minor source rules.**

What has been identified forthcoming related to the Tribal Minor New Source Review Rule– Final. Bundle #1 and Bundle #2

- a) Implementation of Tribal New Source Review Rules, includes:
- Training, outreach, capacity building, planning and development for implementation by tribes and regional offices and meeting data and recordkeeping requirements,
  - Develop general permits and/or permits by rule and other rules to streamline implementation for 11 source categories: gas dispensing facilities; auto body repair and miscellaneous surface coating operations; petroleum dry cleaners; stone quarrying, crushing and screening facilities; hot mix asphalt plants; boilers; spark-ignition engines; compression-ignition engines; graphic arts and printing operations; concrete batch plants; sawmills.

**Indoor air issues involving monitoring equipment.**

IED is sincerely looking at design and adapt new courses with support from IED's existing guidance documents slated to improve single family housing, multi-family dwellings, and schools through our energy savings plus health building performance measures; and to help identify and equip trainers nationwide to teach these courses. This could include an expansion of available IAQ monitoring equipment to support the demand for more IAQ trainings.

**NTC Discussion with Office of Air and Radiation  
Talking Points and Briefing Notes for June 7<sup>th</sup>, 2016 1:30p - 3:00p  
Location: WJC South Room 6045**

**Subject:** RE: Draft Qs and As and Fact Sheet

Hi all,

Just a side note – this is only the OMB package so the fact sheet will definitely be marked as a draft so folks know it is not a final document. Formatting issues and document numbers can/will be corrected and filled in once we get the green light from OMB and we're ready to publish.

Thanks (and great work Dan)!

Ray

**Subject:** Draft Qs and As and Fact Sheet

I used versions that were prepared for the proposal and modified them. Take a look and see what you think. The fact sheet formatting is off a bit.

Ray:

I took the Subpart W package over to Ruth and Wendy. They told me that if the package is going for OMB review, they want only the original. No copies. No CD, but we send them the files by email. Nothing needs to go into CMS until after OMB clears it. You may want to check with them on signature packages.

This is all news to me, but thanks for clearing it up! I'll get the scoop with them on final signature packages, for at least FR notices I know they still require the original +3 copies + the disk.

I will let the special assistants know that the package went over now, I told them this morning on the ADP call that there was a chance it could go over today.

And congrats on getting the OMB package out!

Thanks,

Ray

**Subject:** Call to discuss NESHAPS Subpart w

Hi Dan –

Following up on our phone discussion yesterday to see if there is a good time for a brief phone discussion on the status of the NESHAPS subpart w rulemaking. After talking with Bill, it would be probably be best if the two of you can talk later this week or early next week. Is there a good time for you tomorrow (6/16), Monday (6/20), or Tuesday (6/21)? It doesn't need to be a lengthy discussion – I don't see needing more than 15-20 minutes. Andrea Koch will be away on travel next week, so only Bill VonTill would be participating on NRC's end.

Thanks.

Hi Dan,

Following up on our conversation yesterday, could you forward me the version of the rule that went to OAR for review? And loop me in as you receive feedback from Janet? Thanks!

Emily Seidman | US EPA | Office of General Counsel | Air and Radiation Law Office | Mail Code 2344A | WJCN 7409F | phone: (202) 564-0906

Hello Dan:

I was following up on my phone call to you last week regarding a meeting with Energy Fuels Resources and EPA on Subpart W. I had spoken to Doug Mandeville and Bill von Till at NRC and they indicated they were willing to meet the week of the 25th of July. They offered the 25th or 27th as dates. Any chance we could schedule something with you sometime on the 25th-27th? Any time you could give us would be greatly appreciated. Thank you!

Sincerely,

No problem. I've been swamped since the NMA conference 3 weeks ago.

Currently NRC proposed 25th at 1pm or 27th at 9am. I am trying to schedule additional meetings as well. It always seems easier for a client to travel during the week so perhaps Wednesday afternoon? We'd like to have as many senior people in the room on the rule or those who participated in its drafting if possible. I know we would be bringing myself, Tony, Katie Sweeney, and two EFR people. Let me make sure that the 27th time is still open with NRC.

Chris:

Sorry I did not get back to you last week. It looks like we will have some availability on those dates, particularly in the afternoon. What times would work best for you? If you would like a specific level of management participation, let me know and I will try to line it up. Thanks.

**Subject:** Meeting with Energy Fuels

Hello Dan:

I was following up on my phone call to you last week regarding a meeting with Energy Fuels Resources and EPA on Subpart W. I had spoken to Doug Mandeville and Bill von Till at NRC and they indicated they were willing to meet the week of the 25th of July. They offered the 25th or 27th as dates. Any chance we could schedule something with you sometime on the 25th-27th? Any time you could give us would be greatly appreciated. Thank you!

Sincerely,

Christopher S. Pugsley, Esq.
