

e-Manifest Fact Sheet: TSDFs

On June 30, 2018, EPA launched a national system for tracking hazardous waste shipments electronically. This system, known as “e-Manifest,” modernizes the nation’s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. EPA established e-Manifest per the Hazardous Waste Electronic Manifest Establishment Act, which Congress enacted into law on October 5, 2012. e-Manifest is a multi-faceted program that includes system development; regulation and policy; implementation and communication; and consultation with the e-Manifest federal advisory committee.

What TSDFs Need to Know

- e-Manifest launched nationwide on June 30, 2018.
- Treatment, Storage, and Disposal Facilities (TSDFs) have the option to create and submit manifests electronically.
- TSDFs may continue to use paper manifests; however, use of electronic manifests is highly encouraged by EPA.
- Receiving facilities can use the e-Manifest system to meet manifest recordkeeping requirements under the Resource Conservation and Recovery Act (RCRA) regulations.
- TSDFs must submit all manifests, both paper and electronic, to EPA.
- EPA charges a fee to TSDFs for each manifest submitted. Fees are differentiated based on how the manifest is submitted.
- The 6-copy manifest form has been replaced with a new 5-copy form. The new form became effective on June 30, 2018.

Scope of e-Manifest

e-Manifest facilitates the electronic transmission of the uniform manifest form, which accompanies shipments of hazardous waste. e-Manifest affects any regulated waste shipped on a manifest, including:

- RCRA federal hazardous waste,
- Regulated PCB waste shipped on a manifest,
- State-regulated hazardous waste (if a manifest is required by origination or destination state),
- Very Small Quantity Generator waste (if a manifest is required), and
- Imported hazardous waste.

How e-Manifest Impacts TSDFs

- The e-Manifest Act mandates that the system must cover waste shipments for which either federal or state law require a RCRA hazardous waste manifest for their tracking. Shipments of state-regulated wastes that are not federal RCRA wastes, but that are subject to the hazardous waste manifest under state law, must be included in the system. Conversely, if a shipment is voluntarily shipped on a manifest (i.e., not required to be manifested under either state or federal law), these manifests are not required to be submitted to EPA.
- TSDFs must register with e-Manifest to receive and pay invoices; registering with e-Manifest also allows receiving facilities to view electronic copies of completed manifests, electronically make corrections, and minimize costs of submitting manifests to EPA.
- Generators with accounts are also able to participate in the electronic data corrections process supported by e-Manifest.
- If generators do not create e-Manifest accounts for viewing manifests, TSDFs should make arrangements with them to provide paper copies of completed manifests per the recordkeeping requirements in 40 CFR part 262. The e-Manifest system will only supply electronic copies of completed manifests to registered generators with e-Manifest accounts.

What TSDFs Need to Do

Work with Customers to Select Manifest Creation Option

e-Manifest allows for three types of manifest creation options:

- Paper (generator, transporter, and receiving facility all sign on paper)
- Hybrid (manifest is created electronically in e-Manifest. A hard copy is then printed from the system and signed by the generator and initial transporter on paper. The signed hard copy is then left with the generator, while the remainder of the manifest shipment is executed electronically. The manifest is signed electronically by the initial transporter, any other subsequent transporters, and the receiving facility)
- Electronic (created in e-Manifest and electronically signed by all entities listed on the manifest)

As of June 30, 2018, all receiving facilities must submit manifests to EPA. Electronic and hybrid manifests are submitted to EPA instantaneously, as they are signed electronically by the receiving facility in the system. EPA's Cross-Media Electronic Reporting Rule (CROMERR) provides the legal framework for electronic reporting under EPA's regulatory programs. Those submitting final completed manifests or subsequent corrections need to go through identity proofing and use a CROMERR-compliant electronic signature (e.g., password plus personal challenge question). If a paper manifest is used, the receiving facility must submit the manifest to EPA within 30 days of receipt.

TSDFs can utilize the EPA's e-Manifest website to create electronic manifests for their customers or they can utilize the e-Manifest API (Application Programming Interface) to add e-Manifesting capabilities to their existing manifesting system.

Select Manifest Submission Options and Associated User Fee

TSDFs have several options for submitting manifests to EPA. EPA charges a fee for every manifest submitted to the system based on the manifest type and mode of submission.

- Scanned image uploads incur higher fees.
- Data plus scanned image uploads incur moderate fees.

- Electronic manifests, including hybrid manifests, incur the lowest fees.

EPA publishes user fees on the [e-Manifest website](#).

Register with e-Manifest

e-Manifest registration and instructions are available at: www.epa.gov/e-Manifest. Users can register for different permissions related to whether they want to view, create, and/or sign manifests electronically. Each user must register separately. Additionally, EPA encourages TSDFs to register at least two "Site Managers" per EPA ID who, in addition to all the permissions above, can also approve other users in their company for e-Manifest access. Site Managers receive and are responsible for paying monthly invoices.

Pay Your Invoice

Site managers will receive an electronic copy of their invoice on the first day of the month after manifests were submitted to EPA. Payments of user fees can be made to the U.S. Department of Treasury through e-Manifest by clicking on the "Pay Bill" button. This will pull up a popup window that will allow you to make payments to U.S. Department of Treasury's pay.gov website directly. EPA cannot accept any other method of payment except through the e-Manifest system.
