

Quality Assurance Update

QA WORKGROUP SESSION
SUMMER RTOC – REGION 9
JULY 22, 2021

US EPA's Quality Directives

Establish policy and program requirements for the Agency's Quality Program.

Define the minimum requirements for Quality Programs supporting EPA and partners.

Establish management principles and responsibilities for ensuring EPA environmental information operations:

- Meet Agency quality-related requirements
- Sufficient quality for their intended use
- Support EPA's mission to protect human health and the environment.

US EPA's Quality Directives (Roles)

EPA Quality Assurance Managers (QAMs) or designees: Have delegated authority for the management of the Quality Program as described in their organization's QMP.

Agency Personnel: Perform work associated with environmental information operations as identified in their organization's QMP.

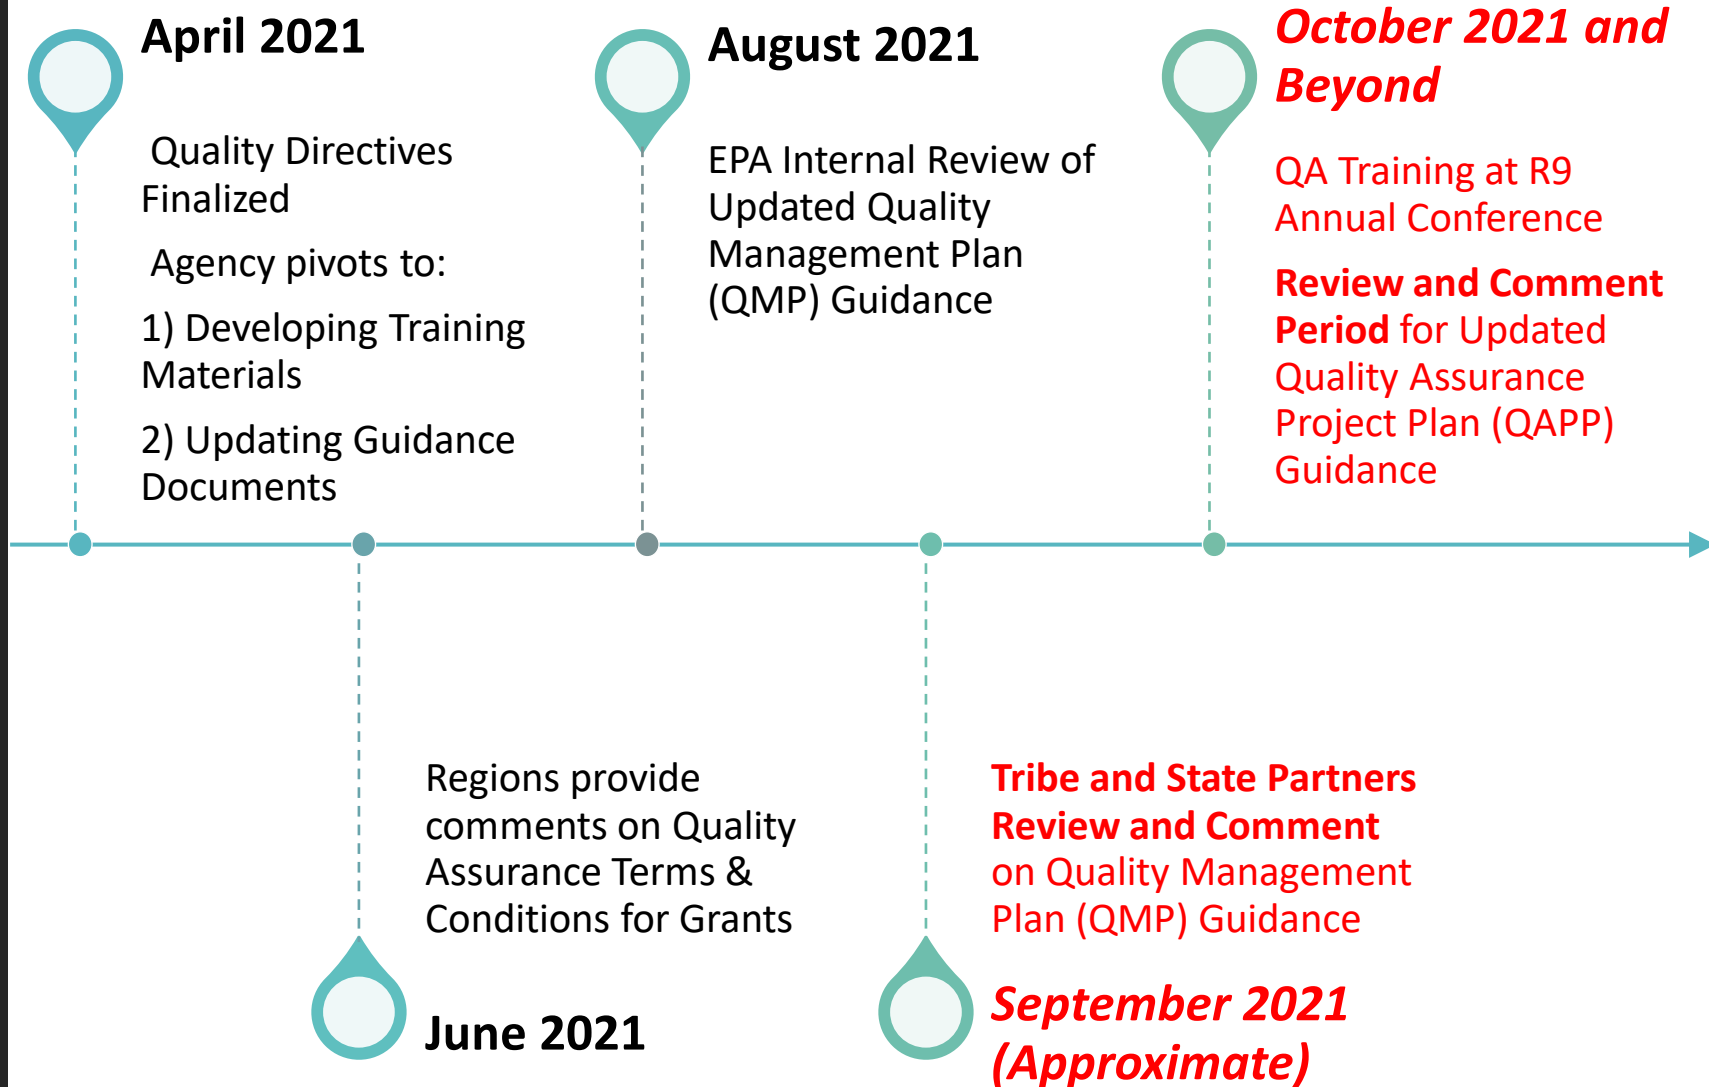

Recipients of Extramural Agreements: Perform all environmental information operations in accordance with this Policy's requirements as defined by federal laws, regulations, and their extramural agreements. The agreement terms and conditions may also specify applicability of the EPA lead organization's QMP.
