PROJECT DESCRIPTION

The Water Authority of Great Neck North's Watermill Lane Water Treatment and Watermain Upgrade Projects will improve drinking water quality for the system's 32,000 users and promote regulatory compliance. The projects include a per- and polyfluoroalkyl substances (PFAS) and 1,4-dioxane treatment system installation, water main upgrades, and fire protection improvements along two main corridors of the service area. Together, they will help ensure safe delivery of water supplies, protect public health, and help meet new statewide contaminant regulatory requirements.

PROJECT BENEFITS

- Protects public health and helps the water system meet new statewide contaminant regulatory requirements.
- Provides a reliable, safe delivery of drinking water to the community.
- Saves Water Authority of Great Neck North approximately \$1.9M by financing with a WIFIA loan.
