

**SEEKING INPUT:
DEVELOPING CLIMATE CHANGE AND ENVIRONMENTAL JUSTICE
DATA AND PUBLIC PILOT TOOL FOR U.S. PACIFIC TERRITORIES**

BACKGROUND

The U.S. Pacific Territories (PT) include Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa. These territories face unique challenges relating to climate change and environmental justice, and they also lack the public-facing geospatial data that EPA has developed and made available for much of the rest of the country (through websites like [EnviroAtlas](https://www.epa.gov/enviroatlas)¹ and [EJScreen](https://www.epa.gov/ejscreen)²). EPA partners in PT communities have requested that these tools and datasets be expanded to cover their regions.

APPROACH

This project will identify and create environmental and public health geospatial datasets (i.e., maps) that can be implemented in existing user-friendly tools (such as EJScreen or EnviroAtlas) for use by interested parties not only to visualize and analyze available data, but also to support environmental decision-making. User engagement is of high priority in determining which datasets and tools are of most interest for these communities.

RESULTS

The resulting tools will aid PT communities in environmental and public health decision making and planning. Users will be able to visualize potential environmental, climate, and health impacts and solutions. This project will support EPA Region 9 in decision-making processes and will benefit PT communities in responding to environmental justice impacts.

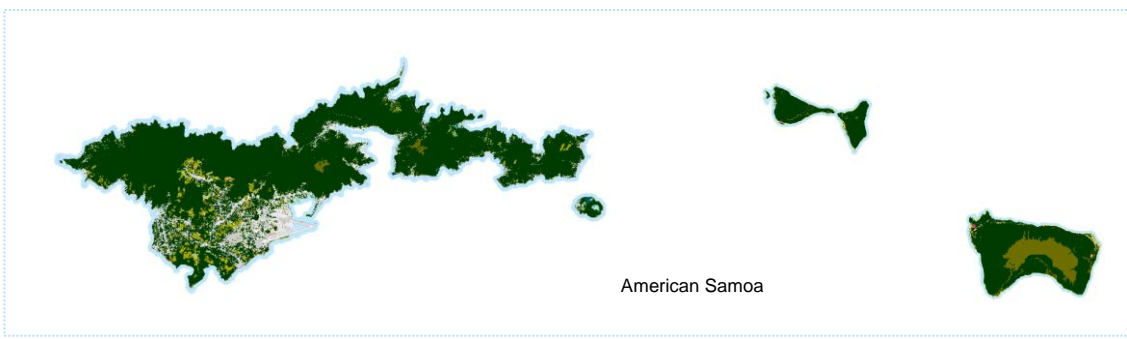

Northern Mariana Islands

Guam

Landcover Class

- Impervious Surface
- Developed Open Space
- Cultivated
- Pasture/Hay
- Grassland
- Evergreen Forest
- Scrub/Shrub
- Palustrine Forested Wetland
- Palustrine Scrub/Shrub Wetland
- Palustrine Emergent Wetland
- Estuarine Forested Wetland
- Estuarine Scrub/Shrub Wetland
- Estuarine Emergent Wetland
- Unconsolidated Shore
- Bare Land
- Water
- Palustrine Aquatic Bed

American Samoa

We want to hear from you about what data would be most helpful to stakeholders, decision-makers, and communities in the U.S. Pacific Territories.
