

NATIONAL LAKES ASSESSMENT 2022

Nutrient Pollution

Nutrient pollution was the most widespread stressor measured

47%
in poor
condition
for nitrogen

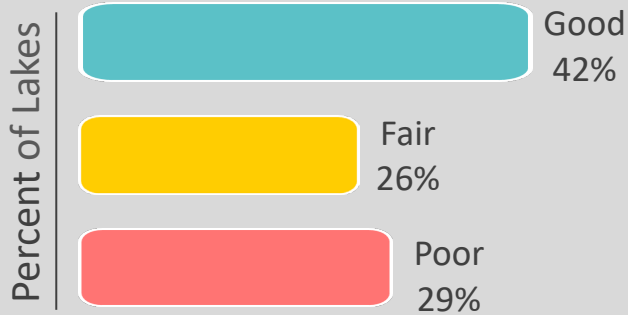

50%
in poor
condition
for phosphorus

Biological Condition

Biological condition based on macroinvertebrate communities

Chlorophyll *a* indicates the amount of algae and cyanobacteria present and was in excess in 49% of lakes

Chemical Indicators

The herbicide atrazine was detected in 41% of lakes and exceeded the EPA level of concern in 1% of lakes

Cyanotoxins were detected in 50% of lakes and levels exceeded the EPA recreational criterion in 2% of lakes
