

ASSISTANT ADMINISTRATOR FOR AIR AND RADIATION

WASHINGTON, D.C. 20460

December 19, 2024

Mr. Aaron Padilla
Vice President, Corporate Policy
American Petroleum Institute

Via Electronic Mail: padillaa@api.org

Dear Mr. Padilla:

This letter concerns the administrative petition of the Final Rule “Greenhouse Gas Reporting Rule: Revisions and Confidentiality Determinations for Petroleum and Natural Gas Systems.” 89 Fed. Reg. 42,062 (May 14, 2024) that you submitted on July 15, 2024, on behalf of American Petroleum Institute. One of the issues raised in your petition is related to the requirement to measure rod packing emissions for reciprocating compressors, including those that elect to replace rod packing on or before 8,760 hours of operation pursuant to 40 CFR 60.5385b(d)(3). Without making a determination as to whether this issue meets the criteria for reconsideration under CAA section 307(d)(7)(B), the U.S. Environmental Protection Agency (EPA) intends to issue a Federal Register notice initiating a rulemaking process, including public notice and comment, on this issue. At this time, we are not responding to the other issues raised in the petition, which we are continuing to review.

Separate from the issue identified above, the EPA is also taking the opportunity to inform you that we have recently updated our Frequently Asked Questions to provide additional clarification on the Final Rule. Please see our page on Frequently Asked Questions on subpart W at <https://ccdsupport.com/confluence/display/faq/Subpart+W.+Petroleum+and+Natural+Gas+Systems> for more information.

We thank you for your continuing interest in this rule, and we look forward to hearing from you during the upcoming rulemaking process on this issue. If you have any questions regarding this letter, please contact Stephanie Bogle at 202-343-9179 or by email at Bogle.Stephanie@epa.gov

Sincerely,

Joseph Goffman
Assistant Administrator
