Clean Energy Systems (CES) is providing financial responsibility pursuant to 40 CFR 146.85. CES plans to use a single financial instrument to cover the costs of: corrective action, injection well plugging, post-injection site care and site closure, and emergency and remedial response. Financial instruments currently under consideration include a: Trust Agreement, Escrow Agreement, or a Certificate of Insurance. The selected financial instrument will use recommended language and be consistent with provisions and exclusions in the actual policy.

Before CES makes a significant financial investment in acquiring site-specific data securing financial assurance(s), CES requests that the Environmental Protection Agency (EPA) review this pre-construction application and if the site characteristics and development plan are suitable, grant CES conditional approval. Upon conditional approval, CES will obtain one of the above referenced instruments and resubmit this application with details.

The estimated costs of each of the covered activities, as provided by Clean Energy Systems, are presented in Table 1. This attachment is one of the several documents listed below that was prepared by Schlumberger and delivered to Clean Energy Systems. These documents were prepared to support the Clean Energy Systems preconstruction application to the EPA.
